

View Anywhere, Share with Ease

Share designs in lightweight formats for fast, install-free access.

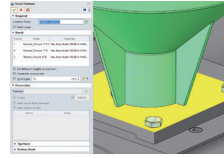

01. Web-Based Viewing

- Export to HTML or PDF for browser-based viewing — no heavy software installation required.

02. Assembly Design

- Create and manage assemblies with essential tools for part placement and constraint setup.

02. ZWCAD Mobile

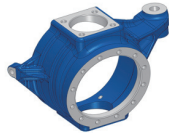

- View, edit, measure, annotate, and print CAD drawings on your mobile device — anytime, anywhere.

Design Basics, Done Right

Use essential 3D modeling tools to build and edit parts with speed and ease.

01. Solid Modeling

- Perform quick geometry edits and visual checks without relying on full design environments.

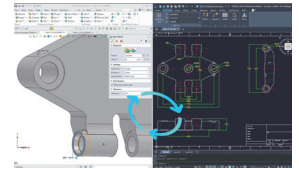

ID	Name	Material	Number	Units	Descr.	Total	Qty	Stock	Qty.
1	S40-D-02-00	Aluminum	Yes	2640	0.00	1	1078.00	1441	1078.00

03. 2D/3D BOM

- Easily view and export 2D/3D BOMs with part details, supporting clear communication from design to production.

04. 2D Drawing

- Create accurate 2D drawings quickly, with live associative updates from 3D models.

Lower Investment with Increased Value

Perpetual License

With a one-time purchase, gain full ownership without recurring subscription fees.

Desktop Availability

Enjoy offline access and enhanced security with a desktop-based solution.

Competitive Pricing

Access essential 3D CAD design-aided capabilities at a fraction of the cost of full-scale CAD systems.

Flexible Upgrade Options

Choose from two flexible upgrade paths for seamless updates to the latest release.*

*Disclaimer:

Upgrade policy may vary by region. Please contact your local distributor or refer to the specific terms in your region for further details.

Two flexible upgrade options are available to suit your needs:

- Yearly Maintenance Plan: Available exclusively for the current version. This option allows a seamless upgrade to the next annual release for free, with continuous access to technical support and software updates.
- Upgrade Plan: Allows updates from any previous version to the latest release, ensuring access to the newest features and improvements regardless of the version currently in use.
